

The following report contains Single Nucleotide Polymorphism (SNP) data for informational purposes only. It is important to note that this data should not be interpreted as medical advice or a substitute for professional medical guidance. The accuracy of the SNP data within this report cannot be guaranteed.

It is strongly recommended that any decisions related to medical treatment, diagnosis, or health management should be based on consultation with qualified healthcare professionals. The SNP data presented in this report is not intended to diagnose, prevent, treat, or cure any disease or condition. Everyone's genetic profile is complex and influenced by various factors, including environmental and lifestyle factors, which may interact with genetic variations in ways that are not fully understood.

Furthermore, the interpretation of SNP data requires expertise in genetics and genomics. Any actions taken based on the information provided in this report are solely at your own discretion and risk. The report's authors disclaim any liability arising from the use or misuse of the SNP data and its interpretation.

It is recommended to seek personalized medical advice from qualified healthcare professionals before making any health-related decisions or changes.
